AI & Healthcare Analytics Consultant | GenAI | RAG | Agentic AI | Python | Azure

Experienced **Data Scientist & AI Consultant with 4 years of experience** designing, developing, and deploying AI/ML solutions across **NLP, Computer Vision, and Generative AI**. Proven expertise in delivering **GenAI, LLM-based systems, RAG architectures, prompt engineering, vector databases, and Agentic AI solutions** across **Healthcare, Life Sciences, and Enterprise Analytics**.

Strong track record in building **end-to-end AI systems** for **decision support, research automation, and insight generation**.

SUMMARY

- I have around 4 years of experience in Data Science and AI/ML, working extensively with Python, classical machine learning, deep learning, NLP, Computer Vision, and Generative AI use cases.
- I have strong hands-on experience with LLMs, Prompt Engineering, RAG architectures, embeddings, and vector databases (FAISS, Pinecone) to build intelligent systems for summarization, research automation, and knowledge extraction.
- I have designed and deployed end-to-end AI solutions including automated data pipelines, intelligent report generation systems, chatbots, and ML-powered APIs using FastAPI, Django, and Flask.
- Additionally I have experience in Microsoft Excel, Word, Copilot, CrawlAI, Cursor, ChatGPT, Bot-Press, Replit etc.
- I am comfortable working both independently and collaboratively with cross-functional teams, translating business requirements into scalable AI solutions while defining KPIs, evaluation metrics, and quality benchmarks.
- I have experience in model deployment, optimization, monitoring, and cost control, along with exposure to cloud platforms (Azure), version control, and production-ready AI workflows.
- **HEALTHCARE & LIFE SCIENCES EXPERIENCE:**
 - Worked on healthcare-focused ML use cases including tumor detection, clinical text processing, and decision-support systems.
 - Experience handling structured and unstructured healthcare data, applying ML/NLP techniques for insight extraction.
 - Understanding of clinical workflows, healthcare analytics, and data-driven optimization in medical & life sciences contexts.

TECHNICAL SKILLS

- **Languages:** Python (Pandas, NumPy, Scikit-learn), C, Java, JavaScript
- **Web Development:** HTML, CSS, Bootstrap
- **Frameworks:** Django, Flask, FastAPI, Spring Boot, Streamlit
- **AI / Machine Learning:** TensorFlow, Pytorch, NLP, CNN, Computer Vision, OpenCV, YOLO, LLMs, Ollama, GANs, RAG, Prompt Engineering, OpenAI APIs, Hugging Face, GenAI, Agentic AI, Web Scraping, BeautifulSoup, Azure Document Intelligence (Azure DI), Azure Service.
- **Databases:** MongoDB, MySQL, Vector Databases (FAISS / Pinecone)

- **Cloud Platforms & Hosting:** Microsoft Azure
- **Tools & Platforms:** Visual Studio Code, Git, GitHub
- **AI Tools:** Copilot, CrawlAI, Cursor, ChatGPT, Bot-Press, Replit etc
- **Healthcare & Life Sciences Analytics:**
 - Healthcare & Life Sciences data understanding (clinical, RWE, EMR – conceptual & project exposure)
 - Predictive analytics, segmentation, and hypothesis-driven analysis
 - Data-driven decision support for healthcare & enterprise use cases
- **Data Visualization & BI:** Power BI, Tableau, Executive-ready dashboards & reporting, Matplotlib, seaborn.
- **Consulting & Professional Skills:**
 - Client communication & stakeholder management
 - Problem structuring & hypothesis-driven analysis
 - Design thinking & solution framing
 - Presentation of insights to technical & non-technical audiences
 - Documentation, POV creation, and executive summaries

EXPERIENCE

- **MaxRidge.AI Tech Pvt. Ltd. – Data Scientist** **(June 2025 – Present)**
 - Working as a Data Scientist, developing LLM-powered systems, RAG pipelines, automated research workflows, and AI-driven report generation solutions, delivering business-ready insights and dashboards.
 - Delivered GenAI, RAG, and Agentic AI solutions for enterprise clients, supporting strategic decision-making and business intelligence use cases.
 - Worked directly with stakeholders to understand business objectives and translate them into scalable AI-driven analytics solutions.
 - Designed AI-powered research and reporting systems for healthcare-adjacent and market intelligence use cases.
 - Collaborated with cross-functional teams (data engineering, product, business) to ensure on-time and high-quality project delivery.
- **QBS Learning Services Pvt. Ltd. – Data Scientist** **(September 2024 – May 2025)**

Worked on NLP and Generative AI solutions, including content reduction pipelines, RAG-based workflows, prompt engineering, and deployment of production-grade AI services.

● **Infyni Tech Pvt. Ltd. – Data Scientist** **(April 2023 – September 2024)**

Built and deployed ML and AI applications across NLP, Computer Vision, chatbots, and recommendation systems, along with API integrations using Django, Flask, and FastAPI.

● **MP2IT Pvt. Ltd. – Machine Learning Developer** **(April 2022 – April 2023)**

Gained strong hands-on experience in classical ML and deep learning models, working on real-world projects in healthcare, finance, and security domains.

● **EGain Institute Agra – Java & Python Developer** **(Nov 2021 – April 2022)**

Gained hands-on experience in classical python and Java Web development.

PROJECTS

AI-Driven Market Intelligence & Report Generation System

Role: Data Scientist / AI Consultant

- Designed and implemented a GenAI-powered intelligence platform enabling leadership teams to access real-time, source-verified insights for strategic decision-making.
- Applied Agentic AI and RAG architectures to reduce hallucinations and improve trustworthiness of analytics outputs.
- Delivered production-grade AI services aligned with enterprise consulting standards, focusing on scalability, reliability, and explainability.
- Built robust web scraping and text extraction pipelines using BeautifulSoup and Azure Document Intelligence (Azure DI) to parse structured and unstructured content from official company sources.
- Integrated RAG-based workflows with vector databases to ground LLM outputs in verified documents and ensure source-backed, hallucination-reduced summaries with reference URLs.
- Delivered scalable, production-ready APIs that return consolidated, investor-ready company research summaries for real-time intelligence queries.

Key Features:

- Automated metadata discovery & validation
- Multi-agent AI orchestration
- Market & financial intelligence generation
- Source-verified (URL-backed) insights
- Asynchronous, scalable API design

Technical Features:

- Built FastAPI-based backend services integrating LLMs, LangChain, LangGraph, and vector databases (FAISS/Pinecone).
- Implemented multi-agent orchestration for asynchronous research, financial analysis, and market intelligence generation.
- Developed robust web scraping and document ingestion pipelines using BeautifulSoup and Azure Document Intelligence.

Technology / Tools:

- **Languages:** Python
- **Frameworks:** FastAPI
- **AI/ML:** LLMs, AI Agents, Prompt Engineering, RAG
- **Agent Frameworks:** LangChain
- **Data Extraction:** BeautifulSoup, Azure Document Intelligence (Azure DI), Serper API
- **Databases:** Vector DB (FAISS / Pinecone), SQL / NoSQL
- **Deployment:** API-based microservices
- **Version Control:** Git / GitHub

AI-Driven Text & Image Generation

Role: Data Scientist

- Built and owned NLP-based text and image generation pipelines, including data cleaning, model fine-tuning, and grade-level-aware content generation for educational products.
- Designed RAG workflows with vector databases to ground LLM outputs in approved curricula and style guides, reducing hallucinations and ensuring pedagogy-safe content.
- Defined and monitored content quality metrics (readability, ROUGE/BERTScore, factuality, age-safety) and conducted A/B testing with editorial teams.
- Deployed production-ready FastAPI/Django services with monitoring, cost optimization, and compliance controls (bias, plagiarism, PII safety).

Key Features:

- Pedagogy-safe text & image generation
- RAG-grounded LLM outputs
- Grade-level adaptive content
- Quality-driven evaluation & A/B testing
- Production-ready AI APIs

Technology / Tools:

- **Languages:** Python
- **Frameworks:** FastAPI, Django
- **AI/ML:** NLP, LLMs, Prompt Engineering, RAG
- **Evaluation:** ROUGE, BERTScore, readability metrics
- **Databases:** Vector DB (FAISS / Pinecone)
- **Data Processing:** Text cleaning, chunking, embeddings
- **Deployment:** API-based microservices

- **Monitoring:** Latency, error rates, token/compute tracking
- **Version Control:** Git / GitHub

AI/ML Solutions for EdTech Platforms

Role: Data Scientist

- Developed Super Resolution–based image enhancement models to improve the quality of instructional and demo videos for edtech platforms.
- Built and deployed ML/AI-powered applications across NLP, Computer Vision, and Recommendation Systems, delivering scalable AI features for production use.
- Designed and integrated RESTful AI APIs using Django, Flask, and FastAPI, enabling seamless integration with client-facing applications.
- Led the development of NLP-based chatbots for course/demo requests, user onboarding, and customer support, collaborating closely with frontend and backend teams.

Key Features:

- AI-powered video/image enhancement
- NLP chatbots for user engagement
- ML-driven recommendation & automation
- Scalable API-based AI services

Technology / Tools:

- **Languages:** Python
- **Frameworks:** Django, Flask, FastAPI
- **AI/ML:** NLP, Computer Vision, Super Resolution, Recommendation Systems
- **Optimization:** GPU optimization, performance tuning, scalability improvements
- **Deployment:** REST APIs, production ML pipelines
- **Version Control:** Git / GitHub

ML/AI Application Development

Role: Machine Learning Developer / AI Consultant

- Developed and implemented **ML/AI-powered applications** for **classification, prediction, and recommendation** use cases across multiple business domains.
- Generated **statistical insights using SPSS** and applied data-driven analysis to support model development and decision-making.
- Built and validated **domain-specific prototypes** in healthcare (tumor detection), finance (stock prediction), and security (forgery detection).
- Applied **classical machine learning and deep learning models**, gaining early hands-on experience in **prompt engineering** and adapting models to real-world business tasks.
- Used **SQL** for data extraction, aggregation, and analytics workflows supporting ML models and reporting pipelines.
- Worked with structured datasets alongside vector databases for hybrid analytics solutions.

Key Features:

- End-to-end ML model development
- Cross-domain AI prototyping
- Statistical analysis & insights
- Business-oriented ML solutions

Technology / Tools:

- **Languages:** Python
- **ML Algorithms:** SVM, Random Forest, Decision Trees, Naive Bayes
- **Deep Learning:** CNN, GAN
- **Analytics:** SPSS
- **Use Cases:** Classification, prediction, recommendation
- **Version Control:** Git / GitHub

EDUCATION

MCA, Agrawan Heritage University (2023 - 2025).

Diploma in IT, Dayalbagh Educational Institute (2020 - 2023)(Correspondent Certificate) .

B.Sc., Dr. B R Ambedkar University Agra (2018-2021).

12th, St. Johns Girls Inter College Agra (2015-2018).

10th, St. Johns Girls Inter College Agra (2016).

PERSONAL DETAILS

DOB: 01 Oct 2000 | **Languages:** Hindi, English | **Hobbies:** Tech surfing, Sketching | **Phone:** 8218282173

Additional Highlights

Contributed to 20+ additional projects featuring advanced livestream capabilities, including audio rooms, multi-host live sessions, and interactive real-time features.
